ICS 207 Area Command Gold King Mine Release 8-9-2015 V1.pdf

I say call your IMT friends in R8 and help them convince management otherwise. Here's what they sent out this am as the AC org chart.

Just took a quick look at the "IAP" - so it's generated by the REOC - a bit odd as it has Ostrander as the IC. Also the email reference to Area Command is curious - has an AC been set up prior to actual field ICPs? I'm guessing not and they are confusing terminology. In my opinion, setting up an AC is probably not necessary and premature. An AC would be needed if we find resource needs to become competitive due to geography/availability.

Again my two cents, we should encourage r8 to standup an ICP close to the impacted area (hopefully they are doing that).

How can help?

Hi Harry/Althea,

We've developed a modified R8 Incident Action Plan (IAP), and want to get your thoughts on how we need to coordinate on this. Does it need to go through Area Command? Do you want us to add info for your regions in addition to what we have? The document is very bare bones at this point, and will be improving over the coming days. Let us know asap so we can continue with distribution! Thanks!
